Being Human, Becoming a Human Being

An Integrative Jungian Approach Relevant for Today

"We are not human beings having a spiritual experience, we are spiritual beings having a human experience." – (Teilhard de Chardin)

In the face of global and personal difficulties, how do we practically realize the identity shift to a spiritual being who *has* a human experience? Are there ways of being human that we have not yet realized? Are we at a threshold of new understanding of our identity and our place in creation?

Jungian and other depth psychologies, as well as contemplative spirituality have given us a foundation for understanding and participating in this shift in human consciousness.

The evening will be both didactic and experiential. It will look at how our dreams, synchronicities, numinous and daily experiences can guide us to awaken the "*immortal within the mortal*" (C.G. Jung)
